ELECTRICITY DEPARTMENT - Establishment - Temporary - South Kanara Extension Scheme - Staff - Continued.

...

GOVERNMENT ELECTRICITY DEPARTMENT.

From

The Chief Engineer for Electricity,
157, Mount Road,
12597 Madras. 2.

To

The Secretary to Government,
Public Works Department,
Madras.

Letter No. 421 H/54-10 dated 12-2-55

Sir,

SUB: Electricity Department--Establishment Temporary--South Kanara Extension Scheme--Staff--Continuance--Proposals.

REF: i) G.O.Ms.5035 Public Works dt.10-12-52.
ii) G.O.Ms.528 Public Works dt.15- 2-54.
iii) G.O.Ms.1213 Public Works dt. 6-4-54.
iv) G.O.Ms.1319 Public Works dt.12-4-54.

::::

I have to state that the existing sanction for most of the posts sanctioned for South Kanara Extension Scheme and connected works accorded in the G.Os cited above will expire by 28-2-55, as detailed in the attached statement.

2) The work on the scheme is progressing, and by the end of February 55, a major portion of the line works will be completed. As regards the rest of the works (e.g. important items in Sub-Stations) some of them will be taken on hand only by the beginning of March 55. As regards the transmission lines, the construction of Hulical-Mangalore Telephone line remains to be taken up and will be completed only sometime after June 55. So also the remaining 25% of Udipi-Coondapur 33 KV line ~~xitk~~ will be completed by 30-6-55.

3) I. With regard to the various sub-stations, the following is the position:-

(a) Hiriadka: Some delay in the receipt of the O.C.B. and the transformers is apprehended. Tenders for buildings are to be called for. By the end of February 1955 the works are expected to be in a beginning stage.

(b) Mangalore: The erection of the substation structures and switchgear is expected to be completed by February 1955. But the receipt and erection of the construction type of OCB and the 3000 KVA transformers to be released by Satyamangalam may be delayed. Regarding the buildings the position of work is stated in para 3.II ~~(5)~~ below.

(c) Udipi 33 K.V. Substation: Approval to the revised site selected for the substation has yet to be accorded and the tenders for the buildings are to be called for as explained in para 3.II below.

(d) Coondapur Substation. The foundation for the structure have been completed. The erection of switchgear and Transformers may also be completed by the end of February 55. But with regards to the building it is expected that only 50% would be completed at the end of March 55 and the balance may be completed by the

end of June 55 (vide para 3.II below).

3.I. The stage of building works at the various substations is furnished below.

Mangalore: The building work has been commenced from 13-12-54 and as per contract the works are to be completed by 12-6-55 . As an I.B. at this station is essential, this work is also to be taken up. The buildings at this substation are expected to be completed by the end of July 55.

Hiriadka: Tenders have been received and it is expected that the work may be started by the end of February 55 and the same may be completed by August 55 as per the time limit by tender.

Coondapur: Tenders have been eceived and the work may be started by the end of February 55 and completed by the end of June 55 as per tender conditions.

Switching Stations: The revised proposals for the two switching stations at Hosanagudi and Holady are to be received from the Executive Engineer after obtaining approval of Chief Operation Engineer (South). The works are to be taken up and completed. The civil works at these stations are likely to be completed along with the works of other substations.

Karkala: Tenders have been received and the work may be stated by the end of February 55 and completed by the end of June 55 as per tender conditions.

Udipi Sub Station. Tenders have to be called for and the work is likely to be started by the middle of April 1955 and the same be completed by the middle of August 1955.

I enclose in this connection a separate statement containing the particulars of work expected to be done upto 28-2-55 and afterwards.

4) As the volume of work to be completed is considerable, continuance of adequate staff as detailed below at least upto 30-9-55 a.n. is quite essential.
